

# Architecting a multi tenanted Application for collaboration and automation amongst Real Estate agents in India

## Business Case:

- There is no one common B2B solution for Brokers/Agents & Builders
- No interface between Brokers/Agents & Builders
- No proper organized way of handling data in case of Brokers & Agents

## Solution Highlights:

- The System allows Brokers/Agents to interface with Builders
- The System allows Brokers/Agents to manage properties
- It is a Multi-Tenanted System
- Has 3 Modules
  - Broker Module
  - Builder Module
  - Admin Module

## Solution Architecture
