

Re-engineering and Re-Architecting a compliance management Application for Microsoft Azure

Business Case:

- Provide a one-point Generic solution to manage generation of Financial data in XBRL format for Regulatory bodies
- Provide a seamless facility to post Financial data to respective Regulatory bodies

Solution Highlights:

- The system allows users to generate statutory XBRL documents that can be submitted to Regulatory Bodies like:
 - Ministry of Commerce (MCA)
 - SEBI
- It is a Multi-Tenanted System
- Has 2 Modules
 - Tenant Module
 - Admin Module

Solution Architecture
