

Re-Architecting/Re-Platforming a multi tenanted Hotel Industry ERP Application on Microsoft Azure (PAAS)

Business Case:

- Their applications were deployed on a hosted server & the provider was not providing satisfactory SLAs
- The cost was also high

Solution Highlights:

- All the major applications of the ERP suite were migrated to Windows Azure.
- The applications were re-architected to effectively use PAAS capabilities of Windows Azure
- Windows Azure SQL Database was used as the primary database
- Audit log was implemented using Windows Azure Table Storage
- Co-located caching was implemented to improve performance
