

Re-Architecting/Re-Platforming a multi tenanted Investment Portfolio Management Application for a website providing transactions and insights to its Customers.

Business Case:

- Provide One Common solution that interfaces with multiple Stock Broker Applications
- Provide a single solution that automatically fetches stock quotes from multiple Stock Markets (BSE/NSE)

Solution Highlights:

- The system allows individuals to manage their investment portfolios.
- The system interfaces with Stock Broker Applications to manage buy/sell instructions
- The system interfaces with Stock Market Applications to fetch latest stock positions
- Multi-Tenanted System
- Has 2 Modules
 - Investor Module
 - Admin Module
